

Race Marks

Inflatable Race Marks

Heavy Duty Race Marks

Norfloat's Inflatable Race Marks are used within jet/water-ski clubs and associations worldwide. Designed and manufactured to Norfloat fender specifications the RM range of buoys offer excellent resistance to impact and the elements whilst offering good protection to the skier.

Features

U.V Stabilised PVC

Manufactured from a UV stabilised marine grade PVC, Norfloat's inflatable buoys will withstand the brightest sunlight for many years.

Tough eye

Norfloat's rope eye is one of the toughest designs in the world. Designed to withstand the rigours of the Norwegian fishing industry, the RM range should last for many years

Lettering

Irremovable lettering and numbering can be moulded into the buoys at time of manufacture, Ideal for course marking and sponsorship.

Valve

The Norfloat valve is simple and effective and allows easy inflation and deflation. The valve is sealed using a coarse threaded plastic screw, which is impossible to cross thread.

The plastic design ensures seawater will not cause corrosion or seizure.
